Web Services: Technology to fit your mission

The OMF web team is excited to launch an Attendance Application in partnership with BASE Camp!

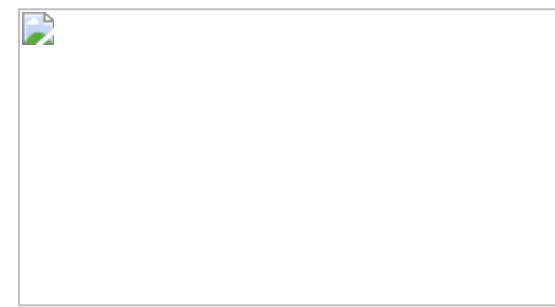

These busy childcare providers needed a way to concretely receive confirmation on which kids are attending when. Phone calls and emails created a lot of overhead and data entry for administrators. OMF helped bridge the gap between their specialized CRM, site workers and families by constructing a single destination for parents to manage their schedule. Administrators can log into the app and easily report on the attendance for any given site on any given day.
